CH 7   not used
CH 8   not used
CH 9   Headless mode
CH10   Return to home (RTH)
CH11   not used
CH12   not used

Setup file

Mix 0 = normal rate
Mix 1 = roll/pitch expert, yaw normal
Mix 2 = roll/pitch/yaw, expert mode

FMD 0 = Normal flight mode
FMD 1 = Headless mode (first calibrate both sticks to center bottom position)
FMD 2 = RTH (Return to home) (flip to FMOD 2 and back again to FMOD 1)

Left trim and/or Right Trim (+ or – button) = Flip mode

Rudder D/R = safety switch: Throttle disabled.
        If rudder enabled, the rates of pitch/roll (ail/elev) are set to 100 in order to be able to
        calibrate the H8 (sticks lower left and lower right)

Trims enabled. The trim buttons of the opposite stick are used. E.g. the left_h stick trims the
horizontal right stick.

Gear switch: If switch enabled (GEAR1) the trainer port is triggerd in stick mode.
